

IMMACULATE NKAMOGELENG MATLOGA

DATA SCIENTIST AND SOFTWARE DEVELOPER

Nkamogeleng is a team player and has a great self motivation skill. She is part of a team at Telkom called data management. Last year, I spend the year at Explore data science academy exploring the world of machine learning and data science in general. This year I started the year at Telkom learning about data governance, master data management, business intelligence and adhoc requests. I am at a stage where I am learning exponentially on this field. I have also explored the field of research and academia. Last year I traveled and attended innovation and research conferences, presenting in a few. I have been working on my writing skills in terms of publishing articles and adding to the research world. In February 2021, I joined Wotechsters Fellowship Software Development track. We build projects from just HTML and CSS to React and C#
